DETAILED ACTION

Election/Restriction

Applicant's election with traverse of Group II (claims 26-28) drawn to process of making a semiconductor device is acknowledged. Accordingly, claims 1-25 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicant has the right to file a divisional application covering the subject matter of the non-elected claims.

The traversal is on the ground(s) that see the election paper. This is not found persuasive because the fields of search for method and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made **FINAL**.

Examiner's Amendment.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Cancel claims 1-25.

Reason for allowance

The following is an examiner's statement of reason for allowance: None of the references of record teaches or suggests the claimed Magnetic Random Access Memory Designs with Controlled Magnetic Switching Mechanism by Magnetostatic Coupling having an MTJ layered stack, the magnetic layers of the stack having a common crystalline anisotropy; patterning within the stack, by photolithography and ion-milling methods, at least two discrete, separated MTJ cell segments of certain geometrical shape, the centers of the segments being distributed along a common line and forming, thereby, a linear chain of cell segments; and magnetizing the segments along the direction of the common line, whereby the magnetization of the segments is maintained by magnetostatic coupling between the segments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
